Market Situation / Background of request	Company Situation²³⁴ - The total sales value of hairstyling is still increasing, mainly still driven by pomade. While cream, gel, and wax tend to decrease. - As market leader in hair styling category, MID should prepare to create new series as a product alternatives that can fulfill consumer dissatisfaction as new trend of hairstyling and increase the usage growth of hairstyling product in the market. Competitor Situation - One of rising hair styling powder by Hairnerds Barber Indonesia. Sold above IDR 100K in online & barber outlet. - Beside Hairnerds, there are some imported products that sells online like Loreal, Schwarkopf, Smith, Chief and Slick Gorilla. Channel Situation - Local barbers product (SMITH & CHIEF) already entered premium store, NCS, H&B cosmetics. Consumer Situation - Barber becoming one of the strongest influencer for the consumers in updating the hairstyle and product trend. - Based on the barbers research in Indonesia, the trend for hairstyle is still mainly preferred from pomade style, but many trend-setter consumer starts to get bored with greasy-neat-neo classic style because of heavy feeling and difficult to style. - Nowadays, many Advance Barbers recommend new styling that is more practical/easy styling (ex: finger combing, hands-free). Give natural finish like CLAY, but it is the lightweight one. It is HAIR STYLING POWDER.-
